

“Improving the initial education of adult immigrants”, 2IMINED,

Nr. 2016-1-LT01-KA204-023223

Partner: Ștefan cel Mare University

Responsible person: Otilia CLIPA

Results of Educators’ survey:

For our survey the number of persons who take part on the interview was 15. The age for these participants was between 35 to 56 years old. The mean for age was 40 years. The gender was 9 male and 6 female. The main sector of work for they is education and training.

Main issues to in obtaining access to education:

At the following questions: What aspect of the socio-educational situation of the country are the most important for immigrants to get acquainted with in their first year? we analyze the answer.

For educators immigrants are very important to give to immigrants to strengthen a legal framework having the intention to manage the stay of immigrants in our country. And others aspect is to develop a permissive legislation in order to facilitate integration into the labor market.

There are also needed: training courses for learning Romanian language, public information campaigners for local people regarding advantages of the incoming workforce; jobs for immigrants.

For the migrants seek about countries is to adapt at the new social area, to the mentality and perceptions of the local people; culture knowledge regarding the host country, new social networks for accepting immigrants and to combats the discrimination.

For an immigrant follows the adaptation- assimilation- integration process and he has to change the language, lifestyle, culture, mentality, habits, he has to be acquainted with the specificity of education system, labor market; he should have enough skills in order to adapt to these changes.

They consider it to be an efficient system for integration, but there is a possibility to improve it regarding European standards. For our country we have a specific practice in educational system - it can offer a minimum necessary for material and cultural integration (scholarships).

The resources in views of educators for all information about country for immigrants are possible to be on official site or social media from embassy, government and friends.

All educators consider in our country exists a lack of information about migrants right or political system or economic system or how to learn easy Romanian languages, health care, leisure, security and geography.

For all this missing information it must to prepare a specific site of web or others forms for communication about necessary information.
