Results of migrant survey

Migrant survey:

Main characteristics of respondents: total number of respondents participated in survey, percentage of women and men, age, nationality, marital status, main reasons for coming to your country.

Our university has a sample which is applied at 104 questionnaires for persons who are immigrants in Suceava. For our sample we have 69 female and 35 men. Percentage is 66% female and 34% male.

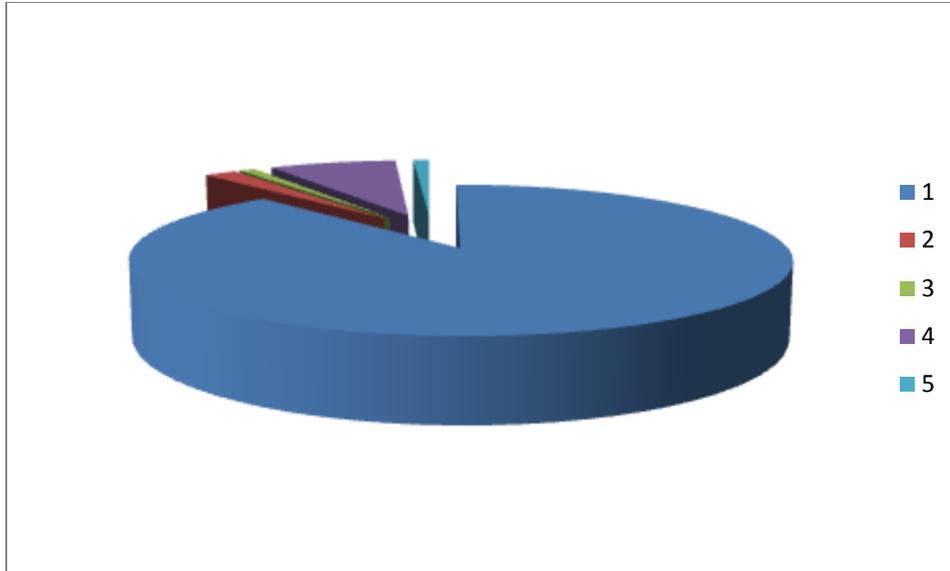

For age of respondents for our institutions we have age between 17 and 31 years old. Mean of this age is around 21 years and standard deviation is 2,29.

Descriptive Statistics

	N	Minimum	Maximum	Mean	Std. Deviation
age	104	17,00	31,00	20,9904	2,29180
Valid N (listwise)	104				

For our sample the nationalities of the respondents are:

- China (2 people),
- Congo (1 people),
- Moldavian (92 people),
- Syria (1 people),
- Ukraine (8 people).

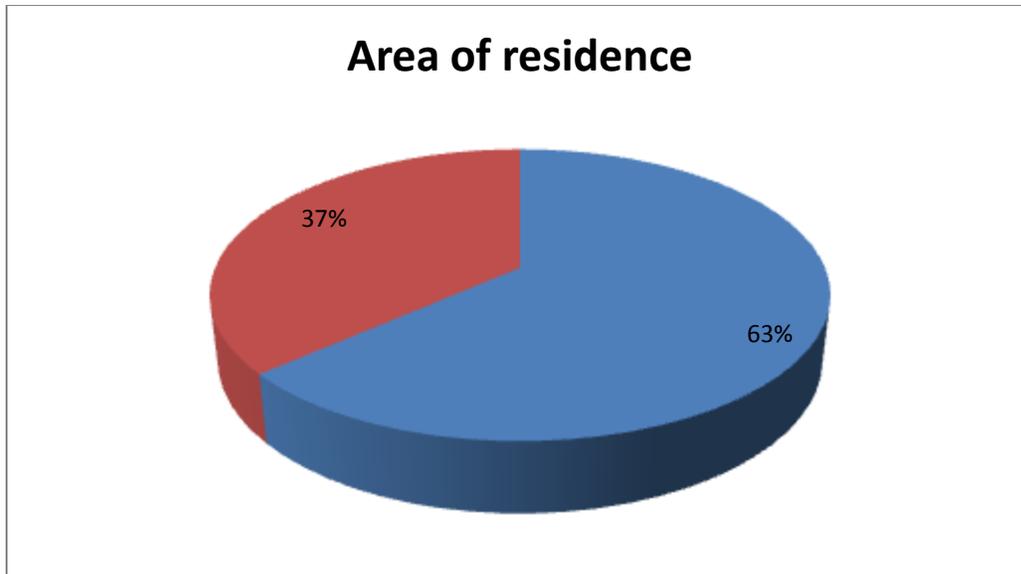

Situation about marital status is:

- Have a friend (1 respondent),
- Married (1 people),
- In relation, living apartment (27 respondents),
- Single (85 people).

The respondents are mostly single because they are young and they are focus on development process.

Reason for coming in Romania for all our respondents is education. In Stefan cel Mare from Suceava we have many students from other country (Moldavia, Syria etc.). The people from Moldavia come in Romania because this is in European Union and our diploma is recognizing in all country from EU.

At the follow questions about the current residence our respondents give these answers:

Main issues to receive information about the country they arrived to:

How much of them wanted to receive more information about the country before coming to?

For Suceava the immigrants receive more information before they are coming in country.

For our sample we have this date:

10 people - a little bit,

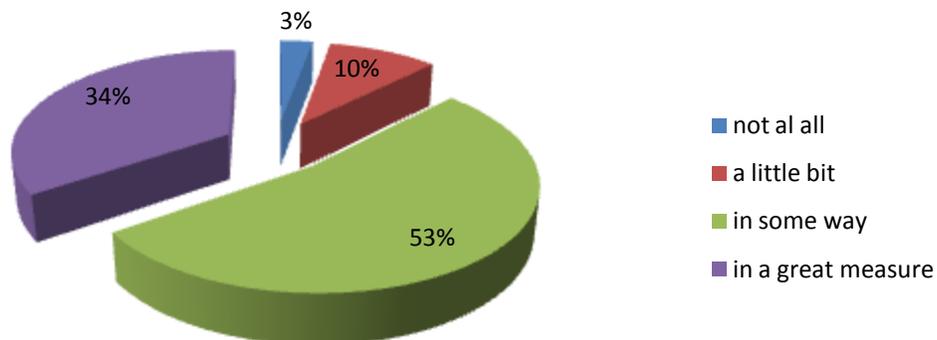

3 respondents - Not at all,

55 people - in a some way,

36 - in a great measure.

All this answers is possible to see in follow picture:

Percent of receive more information about the country before coming to

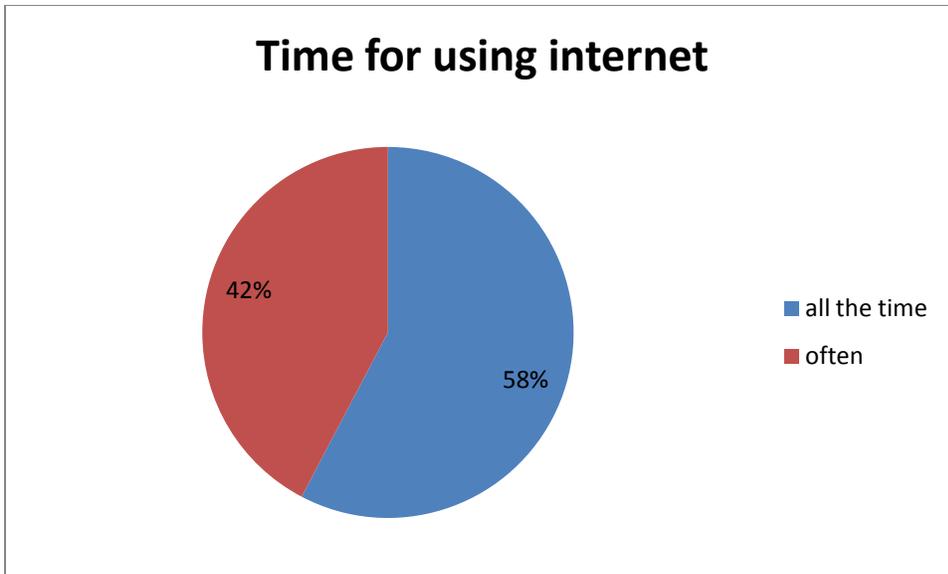

How much of them had an opportunity to receive the information about the country before coming to?

Our respondents have these answers:

- 2 – I had no any information,
- 38 – yes, I had a lot of opportunities,
- 64 – Yes, I have many opportunities

This answers determine us to develop the sistem for distribute some information to the immigrants.

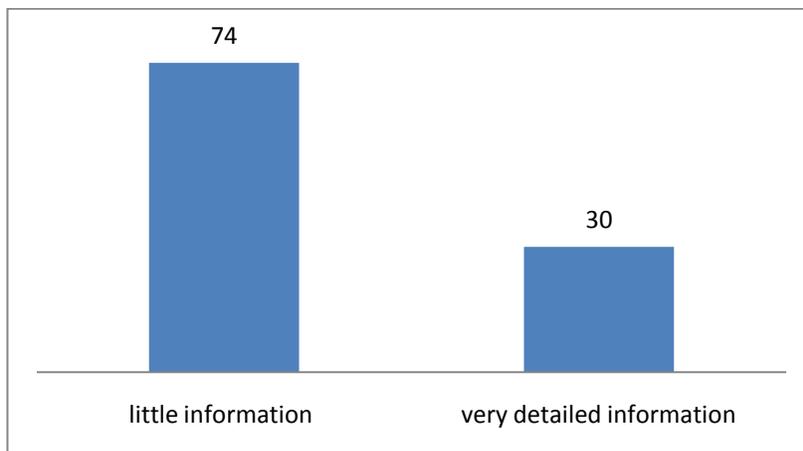

The principal source of information is internet, our respondents use the internet very often. These answers are like in the following figure:

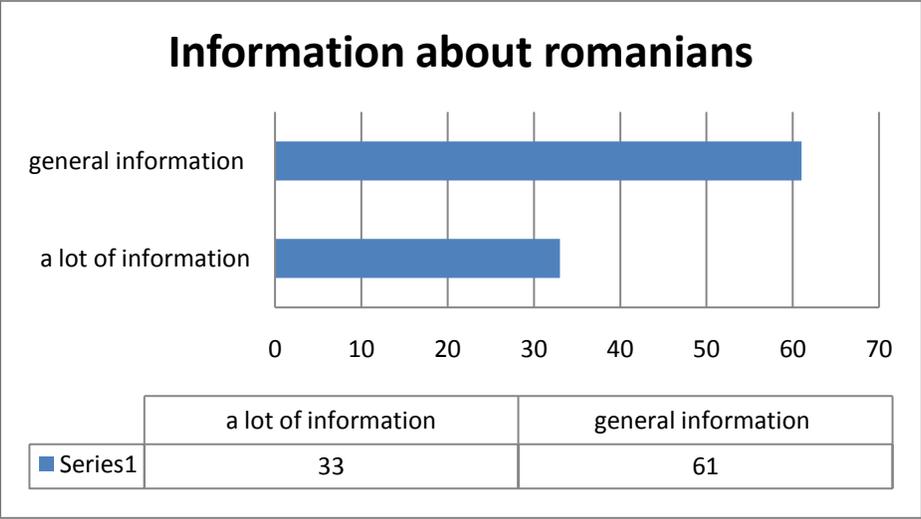

This result is important for the project because is necessary to introduce all information about foreign country on electronic platform. Others resources are official information from embassy, government and friends.

About the main social demographic characteristics are known in a little part of information: political system, economic system, employment legislation, ability to learn the official language, health care, education system, culture, food and culinary traditions, leisure, security, quality of service, geography, climate conditions, the main national and local holidays.

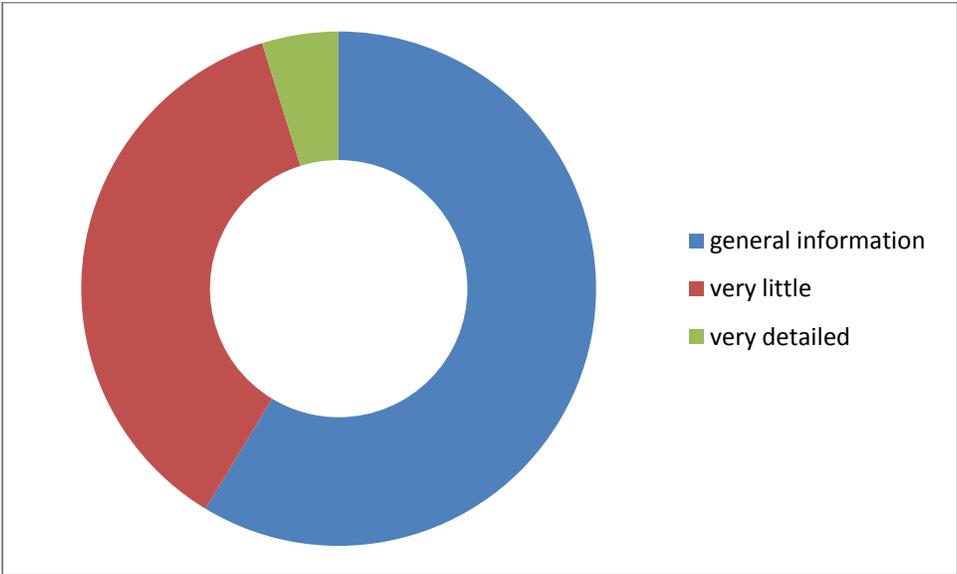

Our respondents choose in a big proportion that no have much information about history of country and only 30 persons consider to know very detailed historical information.

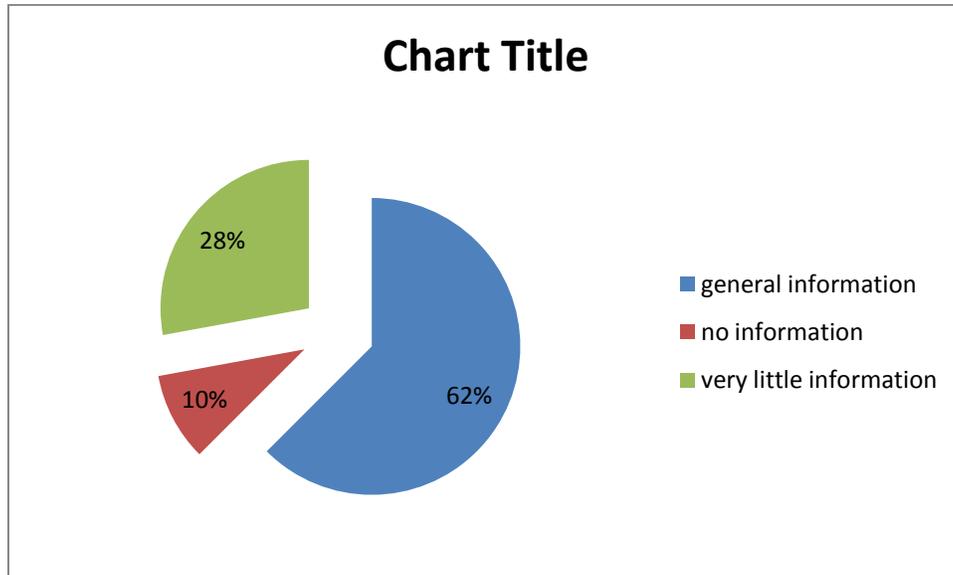

About people of Romania our sample consider to know a lot of knowledge (33 persons) and others doesn't know many things about Romanians (61 persons).

About main characteristic of socio demographic information, our respondents consider they know general information about this (61 people) and 38 people choose they know this information in a very little quantity and only 5 persons have very detailed information.

About political system our respondents consider they had general information in follow percent:

About economical system many respondents no answer because they don t knows anything about this.

In generally the persons know a little information about our social system and for the new immigrants will be very well if they have more simple information about Romania.

For our sample the lacked information was:
